

## *AirStreme* - Environmental Cooling System

HydraLogic designs AirStreme Cooling System dispenses gentle water mist and promotes evaporative cooling for patrons and guests, providing significant relief from heat-related discomfort and health problems – without risk of wetting and pooling.

Installations can be sized for situations as small as residential patios and decks, or built-out to any scale for commercial and industrial outdoor cooling requirements.

### **Application Areas:**

- Hotels
- Restaurants
- Outdoor Cafeterias
- Sports Pavilions
- Club Houses
- Fair Grounds
- Public Areas
- Industrial Areas
- Residential Areas
- And many other areas
